

PDF Test Number 1

Voonami is a next generation cloud computing provider with a team of Data Center Solutions and

Internet Infrastructure. Voonami safeguards corporate computer systems and IT infrastructure

within highly secure and resilient data centers. Voonami currently has a data center in Orem and is building a 100,000 square foot data center in Sandy. Voonami's hosting centers were designed to deliver 100% uptime of power, cooling and network services to protect corporate computer systems and IT infrastructure. Voonami also offers a full suite of managed services to outsource the administration and support of your infrastructure. Voonami's cloud computing supercomputer is a great alternative to purchasing and refreshing computer systems allowing your company to focus on its core business to increase market share versus managing the IT infrastructure.
