

# 60" Triconical 12 Gore Parachute

Scale: 1:3  
Units: Inch

Circumference is pi times diameter.  
Straight lines between gore seams would make for  
an equivalent circumference of  $2 * r * \sin(360/12/2)$   
or  $.259 * d$ ;  $c/12 = .262 * d$
